EDUCATION

PES University

Bachelor of Technology in Computer Science

Bengaluru, India

Aug. 2023 – May 2027

- **CGPA:** 8.55/10.0
- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming, Computer Networks, Machine Learning

TECHNICAL SKILLS

Languages: C++, Python, SQL

Backend: FastAPI, Flask, REST APIs, JWT Authentication

Frontend: React.js, Next.js, HTML, CSS

Databases: PostgreSQL, MySQL, SQLite, Neo4j, ChromaDB

AI/ML: LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, Google Gemini

Tools: Docker, Docker Compose, Git, GitHub

PROJECTS

OntDekker | *Next.js, FastAPI, PostgreSQL, Docker, TypeScript*

- Designed and developed a scalable community-driven travel platform using a microservices architecture, supporting authentication, user profiles, travel communities, guide discovery, expeditions, trip management, and social collaboration.
- Engineered secure RESTful backend services using FastAPI, PostgreSQL, SQLAlchemy, JWT authentication, and Alembic with independently managed service databases.
- Developed a responsive Next.js frontend with reusable TypeScript components and Dockerized the platform using Docker Compose for reproducible deployments.

Clausent | *React, FastAPI, Neo4j, ChromaDB, Hybrid RAG*

- Architected an AI-driven compliance intelligence platform that ingests regulatory documents and maps regulatory clauses against organizational policies to identify compliance gaps.
- Designed a multi-stage compliance pipeline combining regulatory clause extraction, Hybrid RAG with ChromaDB vector retrieval, Neo4j knowledge graphs, and LLM-based compliance mapping.
- Engineered a clause-level risk assessment and remediation workflow with deterministic risk scoring, Random Forest-based explainability, and SHAP, enabling end-to-end traceability from regulatory clause to compliance action.

Healthcare AI Safety Assistant | *Python, React, Flask, Llama 3, RAG*

- Architected a safety-first medical AI framework integrating deterministic rule-based validation, intent detection, risk classification, PHI filtering, and confidence calibration before LLM inference.
- Developed a Retrieval-Augmented Generation (RAG) pipeline using SQLite-backed clinical knowledge retrieval and local Llama 3 inference to generate grounded, citation-aware responses.
- Built an end-to-end web application integrating a React frontend with a Flask backend, enabling secure multi-turn healthcare conversations and structured audit logging.

LEADERSHIP EXPERIENCE

The ChangeMakers Society

Executive Member

PES University

Aug. 2025 – May 2026

- Led planning and execution of **Terrathon 5.0**, a university-wide hackathon sponsored by **CARIAD India**.
- Secured sponsorships through industry outreach, improving participant resources and overall event quality.
- Organized **CIE IGNITE**, an ideathon with **3000+ participants**, promoting entrepreneurship and innovation across PES University.

ACHIEVEMENTS

- Solved **300+** Data Structures & Algorithms problems on LeetCode.
- National Mathematics Olympiad Gold Medalist.
